SUMMARY

A graduating Applied Computer Technology student at United States International University Africa with a strong cybersecurity foundation and practical experience in networking and system security. Interested in real-world security challenges, cloud environments, and building solutions that improve digital safety. Known for analytical thinking, initiative, and collaborative problem-solving.

PROFESSIONAL EXPERIENCE

Craft Silicon Campus, Nairobi, Kenya

01/2026 – 04/2026

Fintech company providing banking, payment, and digital solutions

Information Technology and Networking Intern

- Troubleshoot and resolved network, IP, and connectivity issues.
- Repaired and tested faulty cables and network connections.
- Checked, organized, and managed chargers, adapters, and hardware inventory.
- Provided first-level technical support and assisted in digital workstation setup.

Happy Life Children's Home, Nairobi, Kenya

01/2025 – 04/2025

Children's home providing care, shelter, and support for orphans

Community Service Assistant

- Managed laundry, folding and organizing clothes, sheets, towels, and baby wraps.
- Assisted in kitchen tasks: food preparation, utensil cleaning, and feeding.
- Maintained the compound: sweeping, mopping, scrubbing, dusting, and arranging furniture.
- Provided baby care: feeding, diapering, comforting, play, and developmental activities.

PROJECTS

Digital Evidence Chain of Custody System

09/2025 – 12/2025

Designed and implemented a system to digitize, secure, and automate the lifecycle of digital evidence using Node.js and MongoDB.

FarmGuard

05/2025 - 08/2025

Developed a Flutter-based mobile game by the name FarmGuard that educates rural farmers about phishing scams, integrating Firebase for authentication as well as progress tracking.
